

Experienced Data Science graduate with practical experience in Machine Learning, statistical analysis, and data visualization. Data Science Intern at 10Pearls (Shine Program), where I contributed to real-world ML workflows (using hopsworks) and analytical tasks. Skilled in Python, SQL, Power-BI and Tableau, with experience in developing predictive models and data visualization interactive dashboards. Interested in unlocking valuable insights from complex data and applying for a Junior Data Scientist / AI-ML Engineer positions.

TECHNICAL SKILLS WORK EXPERIENCE

LANGUAGES

Python, SQL, R, MATLAB

DATA ANALYSIS/ ML

Scikit-Learn, XGBoost, TensorFlow/Keras, Pandas, NumPy, Matplotlib, Seaborn.

MLOPS/TOOLS

GitHub Actions, Colab, Jupyter, Git, Hopsworks, Streamlit, MySQL, Power BI, Tableau, Plotly, Excel

CONCEPTS

(EDA), Statistical Modeling, Hypothesis Testing, Feature Engineering, Model Evaluation, Data Cleaning, Predictive Analytics

10 Pearls - Data Science Intern

Oct 2025 - Dec 2025

- Built and deployed a Python-based real-time Air Quality Index (AQI) predictive modeling pipeline for time-series forecasting. Automated the ML lifecycle with a GitHub Actions CI/CD workflow, enabling scheduled retraining and continuous model updates. Managed feature engineering and model versioning using Hopsworks Feature Store and Model Registry.

PIA - Data Science Intern

Sept 2025 - Oct 2025

- Scraped and cleaned operational datasets, then conducted extensive exploratory data analysis (EDA) to surface trends in flight and passenger data. Designed and deployed interactive Power BI dashboards, giving stakeholders self-service visibility into key operational metrics.

Bytewise - Data Science Intern

Jun 2024 - Sept 2024

- Built an end-to-end regression pipeline to predict California house prices, covering data preprocessing, EDA, and model development. Implemented and compared ANN and 1D CNN architectures, evaluating performance using standard regression metrics (e.g., MAE, RMSE, R^2) to identify the best-performing model.

EDUCATIONAL BACKGROUND

DHA SUFFA UNIVERSITY | 2022-2026

BS Data Science

MERITORIOUS SCIENCE COLLEGE | 2020-2022

Intermediate in Pre-Engineering

DAWOOD PUBLIC SCHOOL | 2009-2020

Olevels

CERTIFICATIONS

- Python Smart Pro Course - **Aptech Education**
- Introduction to python - **DataCamp**
- Introduction to SQL- **DataCamp**
- CS50 - **Harvard University**
- Prompt Engineering- **Andrew NG**
- Treasurer** | **ACM-DSU**
- MLSC Volunteer**

TECHNICAL PROJECTS

Smart AQI Predictor SHAP, Ridge, LSTM

Implemented feature engineering, model training (Random Forest, Ridge, LSTM), and deployed predictions via a real-time dashboard

RealEstateML ANN, CNN, Regression

Built a regression-based machine learning model to predict california housing prices using demographic and geographic features.

Explainable ML Web App SHAP, Streamlit

An interactive web application to visualize model predictions with real-time SHAP explanations.

Multimodal AI Intelligence System Gemini Pro API, NLP

Designed an advanced AI system capable of processing and integrating text, images, and structured data for context-aware decision-making.

Customer Segmentation K-Means, Streamlit

Uses K-Means clustering to group customers by purchasing behavior, though tightly overlapping clusters reflect that most customers buy similar products with similar spending patterns.

Multimodal Stroke Severity Detection VIT, LSTM

A prototype that uses one AI model to detect stroke from brain scans and another to estimate speech severity from voice, combining both into a single report.
